

Jisna Siby

(978) 770-5217 | jisnasiby10@gmail.com | linkedin.com/in/jisnasiby/ | Cambridge ON

Data and Business Analytics professional with experience applying data-driven approaches to improve operational efficiency, analyze performance trends, develop KPIs, and support business decision-making. Proficient in Excel, SQL, and Python, with a strong foundation in budgeting, forecasting, project management, process improvement, and cross-functional collaboration.

Employment

Quest Global Software Engineer

Kerala, India
2021 – 2023

- Developed and maintained C++ and Java desktop applications for hospital scanning machines and the Clinical Software Engineering 4.x Image Management project, processing healthcare data from clinical modality machines in full compliance with DICOM standards.
- Collaborated with cross-functional teams spanning clinical engineering and product management to design, implement, and deliver software solutions across multiple major release cycles.
- Performed debugging, troubleshooting, and peer code reviews on healthcare software modules to maintain high-quality code standards and reduce post-release defects.
- Automated new features and enhancements using scripting solutions, improving development efficiency and accelerating feature delivery for clinical applications.
- Recognized with the On the Fly Award for excellence and dedication that directly contributed to on-time project completion and release.
- Provided install-based support for Clinical Software Engineering desktop software deployed in hospitals by resolving high-severity bugs and developing a C++ micro-service using MergeCom and dcmTk libraries to compress patient DICOM files and reduce bandwidth usage.

Education

University of Massachusetts Amherst Isenberg School of Management

2024 – 2026

Master of Science in Business Analytics

- Data Analytics Track
- Relevant coursework: Business Application Development in Python; Statistics for Business; Data Science for Business; Project Management; Machine Learning for Analytics; Database Management for Analytics; Data Visualization in Business; Applications of Artificial Intelligence in Business.
- Hands on experience with SQL coding, Tableau, ERDPlus, Advanced Excel, and SAP Business Objects Analysis.

A P J Abdul Kalam Technological University, Kerala, India

2016 – 2020

Bachelor of Technology in Electronics and Communication Engineering

Cumulative GPA 8.27; Special jury award for portable hand-held heat and cold regulating blender cup; Recipient of 1.5 lakh Rupees project funding from Kerala Startup Mission for Smart Helmet with HMD using AR techniques.

Activities

IEEE ASIET Student Branch

Signal Processing Society Chairperson

2018 – 2019

- Lead monthly meetings on latest trends and publications on various technologies.
- Supported students in finding funding opportunities for their projects.

Membership Development Coordinator

2019 – 2020

- Mentored and advised students to join IEEE and explained the various benefits that come along with it.
- Planned and organized meetings and activities for first year students to feel more welcome into IEEE

Skills

- **Computer:** MS Excel, Microsoft Word, PowerPoint, Access, Linux, Windows OS, GDB, Microsoft Visual Studio, Eclipse IDE, Jenkins, Git, Docker, Kubernetes, Helm Chart, Grafana, Valgrind, BDD, Cucumber framework, DICOM Standard
- **Programming:** SQL, C++, Python, DBMS, Tableau, Pandas, Power BI, Scikit-learn
